

COMPLIANCE • COMPETENCY • PRODUCTIVITY

## What makes ThoughtWare different

1.

### Designed specifically for your industry

Our product is specific for your industry, not a generic one-size-fits-all solution. We have grown to know and understand your industry – the top burning issues and needs, and designed the product to meet those – not functions that some technical person or management team thought you might like.

2.

### We listen

We spoke to you – our customer – to find out what you wanted. Better than that, we listened: what you see in i.on my solutions is what you told us would make your job easier, make you more efficient and more productive. We provided a solution that allows you to get your eye back on your core business.

3.

### We reason

Instead of a massive volume of functions you may never use, we have designed our solutions to help you with just those core functions that can and will make a difference. This means that instead of aiming for a specific product classification like human resources or school administration, we have thought about what matters most and developed the combined functions that are needed. This is the i.on my difference.

4.

### We're realistic

We are priced to suit small and mid size operations. There is no large budget-breaking initial investment: we have a small (\$595) one off set up fee, then for ease of cash flow a monthly subscription fee (based on \$10 per month per full time equivalent) – with no lock-in contracts.

5.

### We value productivity

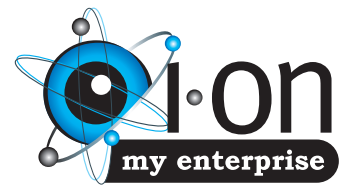

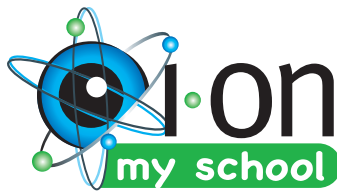

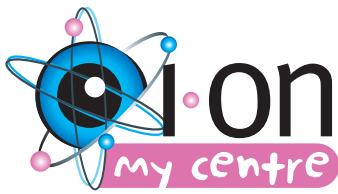

Not just for ourselves but also for you. That is why you will find improved productivity tools such as risk management templates and dynamic survey tools included as part of our product.

6.

### We're proud to be proud

We perform our work in such a way that we can be justly proud of what we achieve.

## What makes i.on my different

When we say our system is flexible we mean *highly flexible* – here is our proof:

- \* You can determine which fields are mandatory
- \* You can relabel/rename fields to suit your purposes
- \* You can rename menus
- \* You get to determine the orders in which menus appear
- \* You decide the order of options within a menu
- \* You can build your own user defined screens
- \* You may even brand the system with your own logo

When we say we provide *unique* functions and capability we mean in addition to the expected risk, hazard, accident and human resource functionality, we also provide you with more that is *truly unique* and *valuable* – here is our proof:

- \* Evidence functionality to map to your accreditation quality areas and principles
- \* Design, administer and analyse your own surveys
- \* Establish your specific alerts and reminders
- \* Checklists that you design
- \* Powerful dashboards
